GB Health and Safety Consultancy

Health and safety service packages

Three practical ways to get support. We agree the work, fee and delivery dates in writing before starting. Each package is tailored to your activities, people and site risks.

Site audit and action plan

A clear view of the gaps and the work needed to address them. The starting scope is one site, one agreed operational shift and up to one day on site.

You receive: a document review, site walk and discussions with key staff; a written findings report; an editable action plan with priorities, proposed owners and dates; and a 30-minute handover call.

Timing: aim for the report within 5–10 working days of the visit and receipt of the agreed evidence. Travel is itemised in the quote. Specialist surveys, certification, testing and return visits are separate.

RAMS and COSHH package

Practical documents for one defined job at one site. The starting scope is one risk assessment and method statement, plus up to five COSHH assessments for specified products and uses.

You receive: a scoping call, task sequence and controls, a substance register, editable documents and PDFs, one consolidated revision, and a short handover. You supply current SDSs, task details and site information.

Timing: aim for a first draft within 5–10 working days once information is complete. A site visit, exposure monitoring, engineering design and additional tasks or substances are quoted separately.

Monthly health and safety support

A named adviser for one agreed business and site, with up to three hours of remote support per month. The allocation includes a 30-minute review call, advice, document review and action tracking.

You receive: an agreed support plan, monthly priorities, a simple action tracker and annual policy review within the time allowance. A competent-person appointment is documented only after the relevant skills, scope and cover are confirmed.

Timing: agree the start date, working hours and response target in the quote. Site visits, emergency attendance and work beyond the allowance are separate. Agree the contract term and unused-hours treatment before starting.

All timings depend on availability and complete information. Your team confirms the documents match the actual work, implements controls and briefs staff. No audit result, client acceptance or certification is guaranteed.
